

MATEUS GOMES DIAS

PERSONAL PROFILE

- Ability to prioritize tasks appropriately;
- Ability to work with precision and autonomy with minimal supervision;
- Ability to work in conditions that require considerable flexibility;
- Ability to work under pressure;
- Ability to handle people with tact and confidentiality;
- Ability to adapt and learn quickly;

Ability to work effectively as a team member, collaborate to achieve team goals, and create a friendly environment.

EDUCATION

Bachelor's in Control and Automation Engineering

Institution: Assis Gurgacz University Center (FAG).

Postgraduate degree in cybersecurity

Institution: PUCPR

CERTIFICATION

Control and Automation Engineer CREA: PR-208040/D

Certified in Cybersecurity (CC) - ISC2
Certification no. 1850440

BACKGROUND

I hold a degree in Control and Automation Engineering and worked in the industrial engineering sector for 5 years, focusing on automation projects with an emphasis on IoT in the niches of poultry farming, slaughter industries, and the grain supply chain. With a disruptive vision, I entered the IT sector in July 2021, working directly in infrastructure project management, strengthening my knowledge in technology environment governance and systems linked to Industry 4.0. Currently, I work as a Technology Auditor, supporting best practices in IT governance, ITGC assessment, and Cybersecurity.

HARD SKILLS

- Risk Management
- Industry 4.0
- Industrial Automation
- CAPEX/OPEX Management

SOFT SKILLS

- Investigation
- Creativity
- Critical Thinking
- Trust Building

INTERESTS

- Innovation
- Investments
- Engineering
- Cybersecurity

BRF - Internal Auditor

OCTOBER 2023 - UP TO NOW

I worked in systems auditing, evaluating IT General Controls (SOx ITGC), assessing internal policies and procedures, coordinating technical teams in cybersecurity resilience evaluations (Pentesters), as well as identifying systemic and/or process improvements related to the corporation's technology environments.

BRF - SR IT Analyst

MARCH 2022 TO OCTOBER 2023

I worked in IT Infrastructure Project Management, driving technological upgrades across the company's business areas, unifying production and corporate environments, and enabling data interaction.

BLACK BOX CORPORATION - Project Coordinator EXP III

JULY 2021 TO FEBRUARY 2022.

I worked as an IT Infrastructure Project Coordinator, serving as the main person responsible for budgetary and strategic planning for hardware upgrades and data integration between industry and corporate environments.

ENGETECH - Automation Technician (Manufacturing)

MAR 2017 - JUN 2021

Throughout my career in industrial automation, I performed various roles up to the position of project manager. I gained solid knowledge in SCADA systems and managed several projects involving the implementation of industrial automation logic, particularly in a food company.

EXPERTISE IN SOFTWARE AND HARDWARE

- Demonstrated proficiency with a wide range of technology tools, including Office 365, Autodesk (CAD), Windows, SQL Server, ServiceNow, and SAP modules such as ECC, SuccessFactors, Ariba, and ECP, as well as ACL for data analytics.
- Extensive experience with Microsoft solutions and cutting-edge AI applications, incorporating platforms like Copilot, Gemini, and ChatGPT to enhance operational efficiency.
- In-depth understanding of industrial communication protocols, such as Modbus, Profibus, and Profinet, alongside practical experience with SCADA systems for real-time process control.
- Expertise in industrial programming languages, including SQL, C, and Python, to develop robust software solutions.
- Skilled in orchestrating and managing cloud infrastructures (SaaS/IaaS) and leveraging virtualization technologies to optimize resource utilization and scalability.
- Proficient in deploying and utilizing forensic and vulnerability assessment tools, with a specialization in Kali Linux for security testing and analysis.
- Well-versed in environments managed by Active Directory, ensuring efficient identity and access management.
- Thorough understanding and management of infrastructure within industrial settings, focusing on Operational Technology (OT) and the Internet of Things (IoT).
- Expertise in overseeing and optimizing the infrastructure of corporate IT environments, ensuring seamless integration and performance.

MULTICULTURAL EXPERIENCE

As an engineer, I have had the privilege of collaborating with companies across Brazil and globally, including in Paraguay, Guatemala, and China. These international business engagements have enriched my linguistic capabilities and broadened my perspective on diverse cultural interactions.

I am currently focused on the development and management of technology solutions that align with market demands to enhance business performance. I have refined my expertise in internal IT auditing, conducting comprehensive system audits, and implementing frameworks such as LGPD, ISO 27001, and MCI. My role involves the assessment of SOx controls and the strengthening of organizational security through consultancy, penetration testing, and vulnerability assessments. Additionally, I possess experience in leading teams to accomplish objectives while overseeing technical activities during audit execution.
